# **KCET EXAMINATION – 2020** SUBJECT: BIOLOGY

DATE: 30-07-2020

TIME: 10.30 AM TO 11.50 AM

1. following classes Fungi Match the (Column-I) with the examples (Column-II)

Co	111	m	n	-T
$\sim$				

## 1) Phycomycetes

Column-II p) Pencillium

q) Alternaria

r) Albugo

s) Puccinia

Choose the correct option:

a) 
$$1 - r$$
,  $2 - p$ ,  $3 - q$ ,  $4 - s$ 

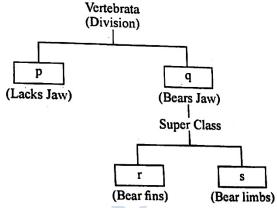

b) 
$$1 - r$$
,  $2 - p$ ,  $3 - s$ ,  $4 - q$ 

c) 
$$1 - p$$
,  $2 - s$ ,  $3 - r$ ,  $4 - q$ 

d) 
$$1 - q$$
,  $2 - p$ ,  $3 - s$ ,  $4 - r$ 

Ans. b

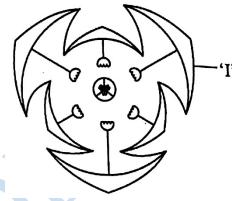

2. Observe the following simplified scheme and choose the correct option that matches with the letters given in the boxes.

- a) p-Tetrapoda, q-Pises, r-Gnathostomata, s-Agnatha
- b) p-Agnatha, q-Gnathostomata, r-Tetrapoda,
- c) p-Agnatha, q-Gnathostomata, r-Pisces, s-Tetrapoda
- d) p-Gnathostomata, q-Agnatha, r-Tetrapoda, s-Pisces

Ans. c

3. Identify the floral unit 'I' in the given floral diagram

- a) Tepal
- b) Perianth
- c) Sepal
- d) Petal

Ans.

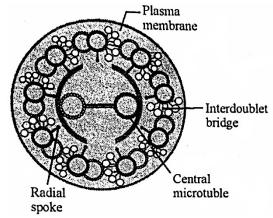

- 4. A student observes grass and Hibiscus plants in his garden during noon. To his surprise, only the leaves of grass were found rolled inwards. The reason could be
  - a) Presence of Bulliform cells in the grass
  - b) Due to higher rate of transpiration
  - c) Presence of more number of stomata on the grass leaves
  - d) Undifferentiated mesophyll in grass leaves.

Ans. a

- 5. Identify the given in meiosis mediated by the enzyme recombinase
  - a) Crossing over
  - b) Interkinesis
  - c) Synaptic pairing
  - d) Terminalization

Ans. a

In the below diagram, identify the part which connects the peripheral microtubules to the central sheath.

- a) Central microtubule
- b) Radial spoke
- c) Plasma membrane
- d) Interdoublet bridge

#### Ans. b

- 7. The element whose percentage weight is highest in both earth's crust and human body is
  - a) Oxygen
- b) Calcium
- c) Hydrogen
- d) Carbon

#### Ans. a

- 8. During Citric Acid cycle, the various organic acid undergo decarboxylation. Which of the following organic acids of the above cycle have 4C, 5C and 6C respectively?
  - a) Pyruvic acid, Malic acid and  $\alpha$ -Ketoglutaric
  - b) Pyruvic acid, α-Ketoglutaric acid and Citric
  - c) Oxaloacetic acid, Citric acid and Succinic
  - d) Succinic acid,  $\alpha$ -Ketoglutaric acid and citric acid

### Ans. d

- 9. The deficiency of which of these elements interrupts photolysis of water during photosynthesis?
  - a) Ca and K
- b) N and P
- c) Mn and Cl.
- d) Zn and Cu

Ans. c

- 10. In C<sub>4</sub> plants, C<sub>3</sub> cycle takes place in
  - a) Companion cells
  - b) Bundle sheath cells
  - c) Mesophyll cells
  - d) Bulliform cells

### Ans. b

- 11. Consider the following statements regarding photosynthesis and respiration in plants and select the correct option
  - I) RuBisCO has high affinity to oxygen in low CO<sub>2</sub> concentration
  - The Calvin pathway occurs in the chloroplast of bundle sheath cells of C<sub>4</sub> plants
  - III) Yeast poison themselves when the concentration of alcohol reaches 7%
  - IV) Oxygen is a final hydrogen acceptor during aerobic respiration
  - a) Statements I & III are correct, II is wrong
  - b) Statements I & IV are correct, III is wrong
  - c) Statements II & II are correct, I is wrong
  - d) Statements I & II are correct, IV is wrong

Ans. b

12. Match the digestive glands given in Column-I with their respective enzymes given in Column-II and choose the combination from

# the given options Column-I Column-II

1) Pancreas

p) Pepsin

- q) Enterokinase
- 2) Gastric glands
- r) Ptyalin
- 3) Small intestine
- s) Trypsin
- 4) Salivary glands
- Choose the correct option:
- a) 1-r, 2-q, 3-p, 4-s
- b) 1-q, 2-s, 3-r, 4-p
- c) 1-p, 2-q, 3-r, 4-s
- d) 1-s, 2-p, 3-q, 4-r

Ans. d

- 13. A girl after attaining sexual maturity shows development of growing ovarian follicles, development of mammary glands and high pitch of voice. There changes are attributed to hormones.
  - a) Progesterone
- b) Androgens
- c) Melatonin
- d) Estrogens

Ans. d

Match the different types of Leucocytes Column-I with their percentage of occurrence Column-II in a healthy adult human and choose the correct answer

Column-I	Column-II		
1) Neutrophils	p) 6-8%		
2) Monocytes	q) 60-65%		
3) Monocytes	r) 0.5-1%		
4) Basophils	s) 2-3%		
5) Eosinophils	t) 20-25%		
Choose the correct option:			

- a) 1-q, 2-t, 3-r, 4-s, 5-p
- b) 1-q, 2-t, 3-p, 4-r, 5-s
- c) 1-q, 2-r, 3-s, 4-t, 5-p
- d) 1-r, 2-s, 3-t, 4-q, 5-p

Ans. b

- 15. In which part of the human brain corpora quadrigemina is located
  - a) Midbrain
  - b) Cerebral hemisphere
  - c) Forebrain
  - d) Hindbrain

Ans. a

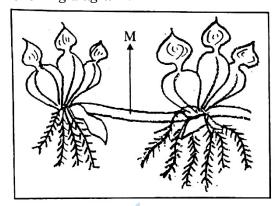

- 16. During an excavation of soil, Pollen fossils were retrieved from deepest remained as fossils because
  - a) The exine of pollen grains is highly resistant to enzyme action
  - b) Pollen grains are asexual reproductive structures
  - c) The intine of pollen grains is made up of
  - d) Exine has spiny Ornamentation

Ans. a

- In apple, the chromosome number of gametes 17. is 17. What is the chromosome number in its Primary Endosperm Nucleus (PEN)?
  - a) 17
  - b) 51
  - c) 34
  - d) 68

Ans. b

18. Identify the vegetative propagule 'M' in the following diagram:

- a) Rhizome
- b) Runner
- c) Bulbil
- d) Offset

Ans. d

19. Match the months listed in Column-I with the organogenesis of foetus in Column-II.

Column-I

Column-II

- I. First month
- a) Separation of eye lids
- II. Second month b) Hairs on head
- III. Fifth month
- c) Heart
- IV. Six month
- d) Limbs & digits
- a) I-d, II-b, III-c, IV-a
- b) I-c, II-d, III-b, IV-a
- c) I-c, II-d, III-a, IV-b
- d) I-b, II-c, III-d, IV-a

Ans. b

- 20. Identify the mismatch
  - a) Synergids Diploid
  - b) Primary Endosperm Nucleus Triploid
  - c) Antipodals Haploid
  - d) Zygote Diploid

Ans. a

- 21. Identify the correct order of events in pollenpistil interaction from the options given below
  - I. Release of male gametes into the embryo sac.
  - II. Deposition of pollen grains on stigma
  - III. Entry of pollen tube into embryo sac.
  - IV. Development of pollen tube
  - V. Entry of pollen tube into the ovule.
  - a) II-IV-III-V-I
- b) V-IV-III-II-I
- c) IV-III-II-V
- d) II-IV-V-III-I

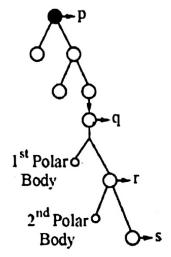

Ans. d

- 22. When the fallopian tube is blocked at ampullary region, the ovum fails to move from
  - a) Isthmus to Uterus
  - b) Infundibulum Isthmus
  - c) Isthmus to infundibulum
  - d) Ovary to ampulla

Ans. b

23. Identify the cells represented as p, q, r and s in the schematic representation of Oogenesis, shown below and choose the correct option.

- a) p-Ovum, q-Secondary Oocyte, r-Primary Oocyte, s-Ovum
- b) p-Oogonia, q-Primary Oocyte, r-Secondary Oocyte, s-Ovum
- c) p-Ovum, q-Oogonia, r-Primary oocyte, s-secondary Oocyte
- d) p-Secondary Oocyte, q-Primary Oocyte, r-Ovume, S-Oogonia

Ans. b

- Which of the following characters was not 24. studied by Mendel in his Pea plant experiments?
  - a) Seed shape
- b) Leaf shape
- c) Stem height
- d) Pod shape

Ans. b

- 25. Which of the following contraceptives could be effective in avoiding pregnancy if used within 72 hours after casual unprotected intercourse?
  - a) Relaxin Oxytocin combination
  - b) Progestogen Estrogen combination
  - c) Androgen FSH combination
  - d) Testosterone Relaxin combination

Ans. b

- 26. Choose the correct statement regarding the GIFT (Gamete Intrafallopian Tube Transfer) procedure.
  - a) Zygote is collected from a female donor and transferred to the uterus of recipient.
  - b) Ova are collected from a female donor and are transferred to the uterus of recipient
  - c) Ova collected from a female donor are transferred to the fallopian tube to facilitate zygote formation in the recipient
  - d) Zygote is collected from female donor and transferred to the fallopian tube of recipient.

Ans. c

- 27. A man with blood group A marries a woman having blood group B. The maximum possible blood groups among their progenies are
  - a) A, B
- b) A, B, AB, O
- c) AB only
- d) A, B, AB

Ans. b

- 28. In an Organism, mutation in a single gene exhibits multiple phenotypic expressions. Identify the underlying genetic mechanism in the above instance.
  - a) Polygenic inheritance
  - b) Multiple allelism
  - c) Pleiotropy
  - d) Incomplete dominance

Ans. c

29. A pure breeding pea plant with round yellow seeds was crossed with pea plant having wrinkled green seeds. On selfing of F1 hybrid of his cross 64 progenies were obtained in F<sub>2</sub> generation. Find out the number of F2 progenies showing non-parental characters. a) 12

Ans. b

b) 24

c) 36

d) 4

- 30. In eukaryotes, the entire base sequence of a gene do not appear in mature RNA because
  - a) Introns are removed during processing
  - b) Some gene sequences are removed by exonuclease
  - c) transcription in eukaryotes consumes more
  - d) coding sequences are removed during processing

Ans. a

- 31. Suppose DNA samples collected for DNA fingerprinting analysis are less than the required quantity. Which of the following techniques is helpful to make the samples sufficient for above analysis?
  - a) PCR
- b) DNA probing
- c) Electrophoresis
- d) Chromatography

Ans. a

- 32. The length of DNA helix in a typical nucleosome is
  - a)  $3.2x10^6$  bp
- b) 6.6x109 bp
- c) 200 bp
- d) 1000 bp

Ans. c

- 33. Which of the following types of RNA carries amino acids towards ribosome during translation?
  - a) tRNA b) mRNA c) rRNA d) dsRNA

Ans. a

- 34. Which among the following was the biggest land dinosaur?
  - a) Brachiosaurus
- b) Triceratops
- c) Stegosaurus
- d) Tyrannosaurus rex

Ans. d

- 35. In a population of plants, some were extremely tall and the remaining were extremely dwarf. No plants of the population showed intermediated height. The type of operation of natural selection in the above cases is
  - a) Stabilizing
- b) Disruptive
- c) Balancing
- d) Directional

Ans. b

- 36. When Escherichia coli cells are cultured in a medium where Lactose is absent, the 'i' gene of Lac Operon continues to produce repressor mRNA because it is
  - a) A constitutive gene b) A structural gene
  - c) A non-coding gene d) An operator gene

Ans. a

- 37. For the given sequence of DNA, identify the complementary sequences of base on its mRNA from the options given below DNA 3'-ATGCATGCATGC-5'
  - a) 3'- UACGUACGUACG-5'
  - b) 5'- GCATGACATGCAT-3'
  - c) 5'-UACGUACGUACG-3'
  - d) 5'-TACGTACGTACT-3'

Ans. c

- 38. The transport of which neurotransmitter is interfered by cocaine?
  - a) GABA
- b) Dopamine
- c) Acetylcholine
- d) Serotonin

Ans. b

- 39. IN the life cycle plasmodium fertilisation takes places in
  - a) Stomach of mosquito
  - b) Liver cells
  - c) Salivary glands of mosquito
  - d) RBCs of humans

Ans. a

- 40. Injection of an antidote against snakebite is an example of
  - a) Passive immunity
- b) Auto immunity
- c) Innate immunity
- d) Active immunity

Ans. a

- 41. Certain tumours are called malignant, because
  - a) They show contact inhibition
  - b) They are not neoplastic
  - c) They are confined to specific locations
  - d) They invade and damage surrounding tissues

Ans. d

- 42. The hybridisation between naturally incompatible plants like potato and tomato can be achieved through
  - a) Conventional breeding
  - b) Mutation breeding
  - c) Artificial pollination
  - d) somatic hybridisation

Ans. d

- 43. A chilly plants was severely infected with Chilly Mosaic Virus (CMV). Identify the technique that helps to raises virus free plants in the next generation from the above virus infected plant
  - a) Self pollination
  - b) Hydroponics
  - c) Artificial hybridisation
  - d) Meristem culture

Ans. d

- 44. White rust resistant variety of Brassica is
  - a) Pusa shbhra
- b) Pusa Komal
- c) Pusa Sadabahar
- d) Pusa Swarnim

Ans. d

- 45. Which of the following plants tissues cannot be used as explant in tissue culture?
  - a) Sclerenchyma
- b) Collenchyma
- c) Meristem
- d) Parenchyma

Ans. a

- 46. In sewage treatment secondary treatment is considered highly significant, because
  - a) It helps in the production of biogas
  - b) It increases the organic content of sewage
  - c) It helps to remove debris form the sewage
  - d) It reduces the BOSD level of sewage.

Ans. d

- 47. Ruminant animals can digest cellulose in their food, where as human beings are unable to do so. This is because
  - a) Cellulose reduces the bulk of food
  - b) Methanogens are absent in human gut
  - c) Methanogens re present in human gut
  - d) Cellulose is a complex sugar

Ans. b

48. Identify the labels M and N in the following Agarose gel electrophoresis representation

- a) M-Largest DNA bands
- N-Smallest DNA bands
- b) M-Smallest DNA bands
- N-Largest DNA bands
- c) M-Digested DNA bands
- N-Undigested DNA bands
- d) M-Hybridised DNA bands
- N-Unhybridised DNA bands

Ans. a

- 49. From the given combinations of steps in PCR, identify the enzyme depended steps
  - a) Denaturation and extension
  - b) Extension only
  - c) Annealing and extension
  - d) Annealing and denaturation

Ans. b

- 50. Biolistics method is suitable for gene transfer into
  - a) Bacteria
  - b) Plant cell
  - c) Viruses
  - d) Animal cells

Ans. b

- 51. Which of the following features of plants is not helpful in adapting to desert life?
  - a) Presence of sunken stomata
  - b) Absence of trichomes on leaf surface
  - c) Presence of thick cuticle on the leaf surface
  - d) Leaves modified into spines

Ans. b

52. In the following equation of Verhulst – Pearl logistic growth, the letter 'r' denotes\_\_\_\_

$$\frac{dN}{dt} = rN\left(\frac{K-N}{K}\right)$$

- a) Carrying capacity
- b) Population density
- c) Extrinsic rate of natural increases
- d) Intrinsic rate of natural increases

Ans. d

- 53. In RNA interface, the dsRNA molecule prevents\_\_\_\_\_.
  - a) Translation of mRNA
  - b) Aminoacylaiton
  - c) Transcription of mRNA
  - d) Transport of RNA from nucleus to cytoplasm

Ans. a

- 54. Now-a-days, the early diagnosis of bacterial of viral infection in humans is possible using
  - a) PCR
  - b) CT scan
  - c) Serum analyser
  - d) DNA sequence

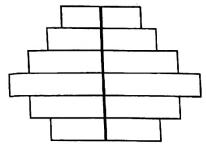

Ans. a

- 55. The organism which invade a bare area to initiate an ecological succession are known as
  - a) Endemic species
  - b) Pioneer species
  - c) Key stone species
  - d) Climatic species

Ans. b

56. The shape of the pyramids reflects the growth status of the population. Identify the type of age pyramid represented below for human population.

- a) Stable
- b) Declining
- c) Ascending
- d) Expanding

Ans. b

57. Identify the possible link 'M' in the following food chain

 $Plant \rightarrow Insect \rightarrow M \rightarrow Snake \rightarrow Eagle$ 

- a) Frog
- b) Ichthyophis
- c) Rabbit
- d) Wolf

Ans. a

- 58. According to Supreme Court of India, ruling with respect to 'Bharat Stage VI' Norms from which date, these are supposed to be implemented in the country?
  - a) 1st January, 2021
  - b) 10th December, 2020
  - c) 1st April, 2020
  - d) 1st June, 2021

Ans. c

- 59. Which one of the following is not included under in-situ conservation?
  - a) Botanical Garden
  - b) Biosphere Reserve
  - c) National Park
  - d) Sanctuary

Ans. a

- 60. Which one of the following is a wrong statement?
  - a) Eutrophication is a natural phenomenon in fresh water lakes
  - b) Ozone in upper part of the atmosphere is harmful to animals
  - c) Most of the forest have been lost in tropical
  - d) Green house effect a natural phenomenon.

Ans. b
